

**Name of the Workshop/Seminar:**

**Research Methodology for Postgraduates**

**Date:** 20-04-2018

**Number of Participants:** 168

The seminar was conducted for all Postgraduate students and faculty by Dr. Srinivas Pachava MDS, Professor and Head of Department of Public Health Dentistry. Research Methodology provides a detailed plan that helps to keep researchers on track, making a smooth effective and manageable it allows reader to understand the approach and methods used to reach conclusions. Participants were enlightened on various topics like research methodology, study design, sampling methods, multivariate analysis and ethical issues in biomedical research. About 168 participants have attended the Seminar.

LIST OF PARTICIPANTS**

**Name of the Workshop/Seminar:**

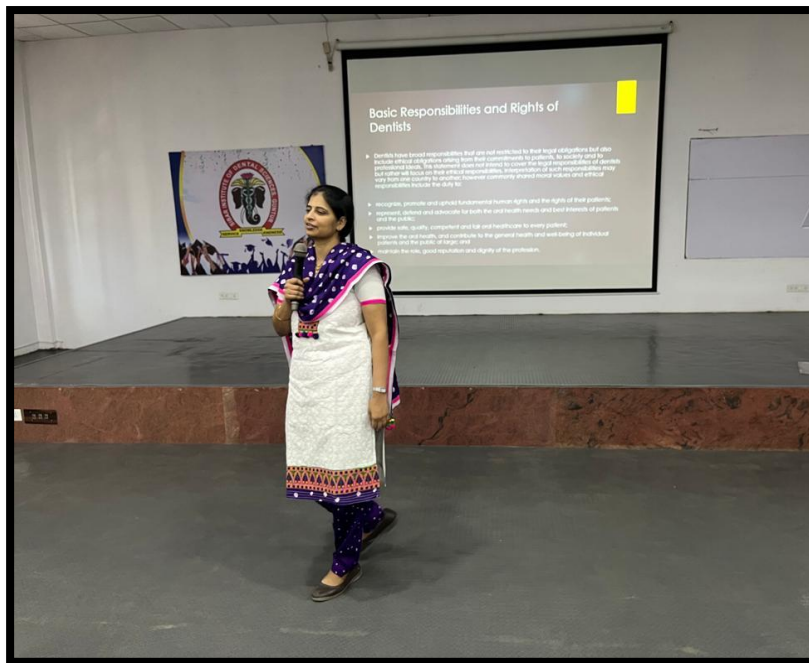

**Workshop on Good Clinical Practice**

**Date:** 09-03-2018

**Number of Participants:** 139

Good clinical practice is defined as “a set of internationally recognized ethical and scientific quality requirements which must be observed for designing, conducting, recording and reporting clinical trials that involve the participation of human subjects.” Compliance with this good practice provides assurance that the rights, safety and well-being of trial subjects are protected, and that the results of the clinical trials are credible and accurate. GCP aims to ensure that the studies are scientifically authentic and that the clinical properties of the investigational product are properly documented. GCP guidelines include protection of human rights for the subjects and volunteers in a clinical trial. Workshop was given by Dr. Y. Samata, Professor, Department of Oral Medicine and Radiology. Over 139 participants attended the workshop.

## **Name of the Workshop/Seminar: Professional Ethics**

**Date:** 22-09-2017

**Number of Participants:** 117

Professional ethics are standards set by professional organizations for the behavior and values of people working within a specific field. Codes of professional ethics are established in order to provide guidance to professionals, usually to not abuse client relationships and preserve the integrity and reputation of the applicable profession. When a person violates one or more of these promulgated ethics, he or she is subject to disciplinary action by the governing body of the profession. A high level of adherence to a code of professional ethics is needed so that the public will be confident in the moral standards of those working in the field. Dr.CH. Ram Sunil MDS, Professor, Department of Conservative Dentistry and Endodontics, gave the Seminar for Interns, III MDS students. Participants had an interactive session with the speaker. Over 117 participants attended the Seminar.
