On the occasion of Cons and Endo celebrations MDEC, Sibar Institute of Dental Sciences along with conservative dentistry department has organized a program to improve the analytical skills in students by presenting table tops on the topic “IMPORTANCE OF CONSERVING A TOOTH” The program is open to all students, and MDEC has received 6 presentations with 23 participants on the day of the program with wide variations in presentations from tooth carvings on wax to carvings on fruits. Active participation is observed from all the students. The program continued till 2.00pm and ended with distribution of participation certificates to all the participants

LECTURE ON IMPORTANCE OF CONSERVING A TOOTH ON 5/03/2018

Date: 16-12-2017

Time: 12.00pm to 4.00pm

Types of programme: Human value development

Topic: “**Positive Minds**” Relax, Renew and Revive

Speakers: **Dr. Manda Chiranjeevi Das,**

Target group/ audience: 1st and 4th BDS

Number of participants: 162

Minutes of the programme:

One of the common dilemmas a graduate face even after toilsome years of degree completion is how to develop a positive attitude, **Medical and Dental Education Cell, Sibar Institute of Dental sciences, (MDEC)**; organized a session by the renowned speaker **Dr. M.C.DAS SIR** on ‘**POSITIVE MINDS**’ aiming to improve the development of positive nature and proper mindset. The program received overwhelming response from the target group 1st and 4th BDS students with more than 162 attendees. It was a very interactive session reflected by over an hour dedicated solely for queries clarification.

LECTURE ON POSITIVE MINDS BY DR MANDA CHIRANJEEVI DAS ON 16/12/2017

Date: 25.10.2017

Time: 02.00PM to 03.30PM

Type of Program: Professional development program

Topic: **“THE ART OF TREATMENT PLANNING AND CASE PRESENTATION”**

Speaker Profile: Dr. Lee Brady DMD

Dr. Lee Ann Brady is a privately practicing dentist and nationally recognized educator and writer. Her practice experience has been rich and varied. She has worked in a variety of practice models from small fee-for-service offices to large insurance-dependent practices, as an associate and as a practice owner.

From 2005 to 2008 Dr. Brady held the positions of Resident Faculty and Clinical Director for The Pankey Institute. In 2008 she moved to Scottsdale, Arizona to join Dr. Frank Spear in the formation of Spear Education and the expansion of his curriculum. She served as Executive VP of Clinical Education until June 2011. As Director of Education and President of Lee Ann Brady LLC, she launched her website www.leeannbrady.com offering clinical and practice content daily as well as innovative online and live education programs. Dr. Brady is the clinical editor for the Seattle Study Club Journal and a guest faculty member at The Pankey Institute.

Target Group/ Audience: INTERNS

Number of Participants: 61

Minutes of the Programme:

The webinar started at 2:00 PM. This webinar is aimed for the interns to improve their clinical knowledge and presentation skills that help them in their higher studies.. The topic selected for the webinar is “THE ART OF TREATMENT PLANNING AND CASE PRESENTATION” given by Dr. Lee Brady DMD. This webinar is taken from the Colgate Oral Health Network website. The webinar presented a systemized approach to treatment planning and case presentation. This comprehensive approach covers the areas of esthetics, function and health. It emphasized the decision points and data necessary to plan for success in all three areas. The webinar went on till 03.15PM. After which for about 15mins programme moderator interacted with interns and clarified their questions regarding the topic.

LECTURE ON THE ART OF TREATMENT PLANNING AND CASE PRESENTATION ON 25/10/2017

Date:12- 01- 2018

Time:3-4pm

Types of Programme: Professional development

Topic: The Immature Permanent Tooth – Minimally Invasive Restorative and Endodontic Techniques

Target group / audience: Interns

Number of participants: 66

Minutes of the programme:

A successful root canal procedure increases the likelihood that the tooth will continue to function normally within the mouth for a significant amount of time. After endodontic treatment, the lifetime of a tooth is dependent on the amount of residual tissue and healing. Endodontic outcomes are also affected by factors such as the quality of the root canal filling as well as the structural integrity of the tooth after the root canal preparation. Although a more conservative approach is being promoted in the present day, this has been made feasible by many new technologies and processes. The significance of preservation and a cautious therapeutic strategy cannot be understated. This innovative kind of root canal therapy, known as minimally invasive endodontics (MIE), takes a different approach that focuses on minimizing structural alterations after treatment. Treatment and prevention of pulpal diseases and apical periodontitis, as well as preserving as much good tissue as possible, are all part of the MIE method, which is safe, accurate, and time-saving. Keeping this in mind MDEC, SIBAR institute of dental sciences has organized a webinar for interns on the topic “The Immature Permanent Tooth – Minimally Invasive Restorative and Endodontic Techniques”. This energetic webinar enlightened the participants. A total of 66 members participated in the webinar. Overall webinar went well with a good take home message.

Time: 3-4pm

Types of Programme: Professional development

Topic: Training On EBSCO Journal Platform

Speaker profile: MR. PRADEEP, TRAINING MANAGER, SOUTH INDIA,
EBSCO

Target group / audience: Staff and postgraduates

Number of participants: 87

Minutes of the programme:

EBSCO host is an intuitive online research platform used by thousands of institutions and millions of users worldwide. With quality databases and search features, EBSCO host helps researchers of all kinds find the information they need fast.as the postgraduates and staff write research or review papers. So they need to go through various articles in high impact journals. One of such research platforms is EBSCO host. So NTR University of health sciences planned a program in coordination with MDEC of SIBAR dental college. To this program 72 postgraduates and 15 staff members attended the program. This was well conducted program where students and staff learned many new things about platform and this definitely help them in their research process.

Date: 09- 02- 2018

Time: 3-4pm

Types of Programme & Category: Professional development

Topic: Communicating With the New Generations. The New Challenge for Dentists

Target group / audience: Interns

Number of participants: 86

Minutes of the programme:

Most of the children and parents are virtuous and will give us plenty of reasons to enjoy what we do. Unfortunately, we all know that something is somehow wrong with these new generations. Parents and children sometimes place Paediatric dentists in a dilemma. The social structure changes every few years causing a burden on how to deal with these families. For this reason, dentists might decide to sedate or go to the operating room when these children might be potentially good dental patients. Deciding this course of action, does not allow us to bond with them. Bonding with children must be worked and nurtured. Knowing our children and adolescents will allow us to detect potential physical or emotional hazardous behaviour. Keeping this in mind MDEC, SIBAR institute of dental sciences has organised a webinar for interns on the topic “Communicating with the New Generations. The New Challenge for Dentists”. A total of 86 students participated in the program.

Topic: SOCIAL MEDIA MARKETING FOR DENTAL PROFESSIONALS

Target group / audience: Interns

Number of participants: 70

Minutes of the programme:

The use of Social Media (SM) use is rapidly growing worldwide. It presents a variety of platforms through which information and ideas can be created and shared across online networks. These online networks are used to share opinions and connect to other people around the globe. Other than personal communication, the use of SM had evolved throughout the years to include other aspects such as education, business, marketing, and consultation. Using SM for marketing was a marketer to reach a huge number of consumers. Customers can rate their satisfaction with a certain service provider and show the reasons behind their rating, which act as a guide for other customers. Studies indicated that positive online reviews increase sales and that negative reviews decrease sales and consumers. Keeping this point in view MDEC, SIBAR institute of dental sciences has organized a webinar on the topic ‘SOCIAL MEDIA MARKETING FOR DENTAL PROFESSIONALS’. A total of 70 interns participated in the webinar with a good Take home message.

The image is a screenshot of a Zoom meeting slide. On the left, there is a video feed of Rita Zamora, a woman with dark hair and glasses, wearing a red blazer. Below her video feed, a name tag reads "Rita Zamora, Bachelor's Degree Business & Marketing". The main slide content features the "Colgate Oral Health Network" logo at the top left, which includes the text "Colgate Oral Health Network" and "Professional Education and Development" next to a red molecular structure icon. The title of the presentation is "Social Media Marketing for Dental Professionals" in red text, with "Rita Zamora" listed as the presenter below it. A list of learning objectives is provided under the heading "Participants will learn:", including points about the importance of social media for dental practices, protecting online reputations, effective social media tools, and how other practices manage marketing. On the right side of the slide, there is a portrait of Rita Zamora, a woman with dark hair, wearing a black blazer and a colorful necklace, smiling.

Topic: Oral Health Care for HIV Positive Patients

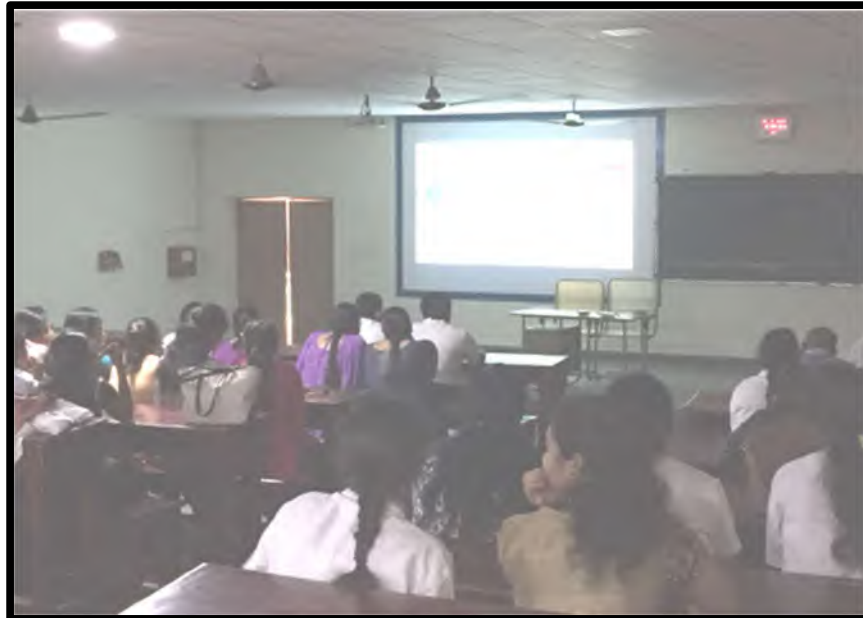

Target group / audience: Interns

Number of participants: 85

Minutes of the programme:

Innovations and the increasing effectiveness of HIV treatments over the past few decades have significantly improved survival rates for these patients. As such, HIV for many individuals is considered as a chronic condition that can be managed by primary care physicians. Improving oral health care for HIV patients can be accomplished through health promotion and disease prevention, health maintenance, counselling, patient education, diagnosis and the treatment of acute and chronic diseases. In regular OPD we will encounter the HIV patients, so this webinar helps the interns to educate the HIV patients. Keeping this in mind MDEC, SIBAR institute of dental sciences has organized a webinar for interns on the topic “Oral Health Care for HIV Positive Patients”. A total of 85 interns participated in the webinar.

Oral Health Care for HIV+ patients

David Reznik, D.D.S.

This presentation will enable the participants to accurately diagnose and manage the most common oral opportunistic infections seen in association with HIV disease.

Participants will learn:

- Be aware of the latest trends in the oral manifestations of HIV in the era of combination therapies.
- Be able to identify and manage the most common oral manifestations seen in association with HIV disease.
- Understand clinical management issues for treating patients living with HIV/AIDS in the dental office including an understanding of relevant medical lab values.

LECTURE ON ORAL HEALTH CARE FOR HIV POSITIVE PATIENTS BY DAVID REZNIK ON 13/04/2018

Date: 11- 05- 2018

Time: 2pm- 3.30pm

Types of Programme: Professional development

Topic: ORAL HEALTH AND DENTAL TREATMENT FOR THE PREGNANT PATIENT

Target group / audience: Interns

Number of participants: 83

Minutes of the programme:

The dental management of pregnant patients requires special attention. Dentists, for example, may delay certain elective procedures so that they coincide with the periods of pregnancy which are devoted to maturation versus organogenesis. At other times, the dental care professionals need to alter their normal pharmacological armamentarium to address the patients' needs versus the foetal demands. Applying the basics of preventive dentistry at the primary level will broaden the scope of the prenatal care. Webinar was conducted on 11th May 2018 for interns at lecture gallery from 2pm-3.30pm on the topic oral health and dental treatment for the pregnant patients. The course presented the oral manifestations that may be encountered in pregnancy and many myths regarding dental treatment for pregnant patients.

LECTURE ON ORAL HEALTH AND DENTAL TREATMENT FOR THE PREGNANT PATIENT ON 11/05/2018

Date:25-11-2017

Time:09.00 am to 4.30 pm

Topic: CAREER CROSS ROADS

Speakerprofile:Dr. Deepak Muchala, Dr.RapatiDurgakant, Dr.G.Sarat,

Target group/audience:Final BDS and Interns

Number of participants:132

MINUTES OF THE PROGRAMME

As a part of employability skill development programme, medical and dental education cell has organized a career crossroads for all the interns and upcoming interns on the topic **CARRER CROSS ROADS**.SpeakersDr. Deepak Muchala, Dr.RapatiDurgakant, Dr.Sarath,has enlighten the various aspects related to career options for interns after BDS. All the interns and final year students attended the programme and had in depth discussion and interaction with the speaker. Over 132 students attended the programme. Programme culminated with the thank you note.

LECTURE ON CAREER CROSS ROADS BY DR G SARAT ON 25/11/2017

Date: 15/09/2017

Time: 2:30 to 4.15 PM

Type of programme: Employability skill development Programme

Topic: Career options for a BDS graduate

Speakers profile: Dr. Vivekananda Kattimani, MDS, Department of Oral and maxillofacial surgery

Target group/audience: I BDS and II BDS

Number of participants: 161

MINUTES OF THE PROGRAMME

After finishing five years of the BDS course, including four years of academics and a one-year internship, candidates look for opportunities in this field. BDS offers a bright career prospect to students due to the high demand for graduates in India and abroad in various medical and dental science domains. There are multiple avenues where BDS students can make careers at. So, with the aim of educating students from initial days of course about various future career options, we have conducted an Employability skill development programme organized by **MDEC** at **SIBAR Institute Dental Sciences**. The speaker for this topic is Dr. Vivekananda Kattimani, Reader in the Department of Oral and Maxillofacial Surgery, SIBAR Institute of dental sciences, Guntur. Around 161 students attended the programme and in-depth discussion was done along with question-and-answer interactive session. Finally, the programme ended by handing over the certificate of appreciation and a thank you note.

Date: 14-08-2017

Time: 2.00 pm to 4.00pm

Types of programme: EMPLOYABILITY SKILL DEVELOPMENT

Topic: “Good clinical setup”

Speakers: Dr.Lalith Prakash Chandra, Reader, Department of Oral Pathology

Target group/audience : III BDS, Interns, Post graduates

Number of participants:160

MINUTES OF THE PROGRAMME

One of the common dilemmas a graduate or a postgraduate, faces even after toilsome years of degree completion is how to build a new practice from the ground up, remodeling and upgrading of existing clinics. To help the young minds in this aspect **Medical and Dental Education Cell, Sibar Institute of Dental sciences, (MDEC)**; organized a session by the renowned clinician **Dr.Lalith Prakash Chandra** on **‘GOOD CLINICAL SETUP’**. The program received overwhelming response from the target group III BDS, Interns and post graduates with more than 160 attendees. It was a very interactive session reflected by ample time dedicated solely for queries clarification
