

**Date:** 01/09/2020

**Timing of the Program:** 10:00AM to 12:20PM

**Topic: “Communication Skills and Clinical Etiquette”**

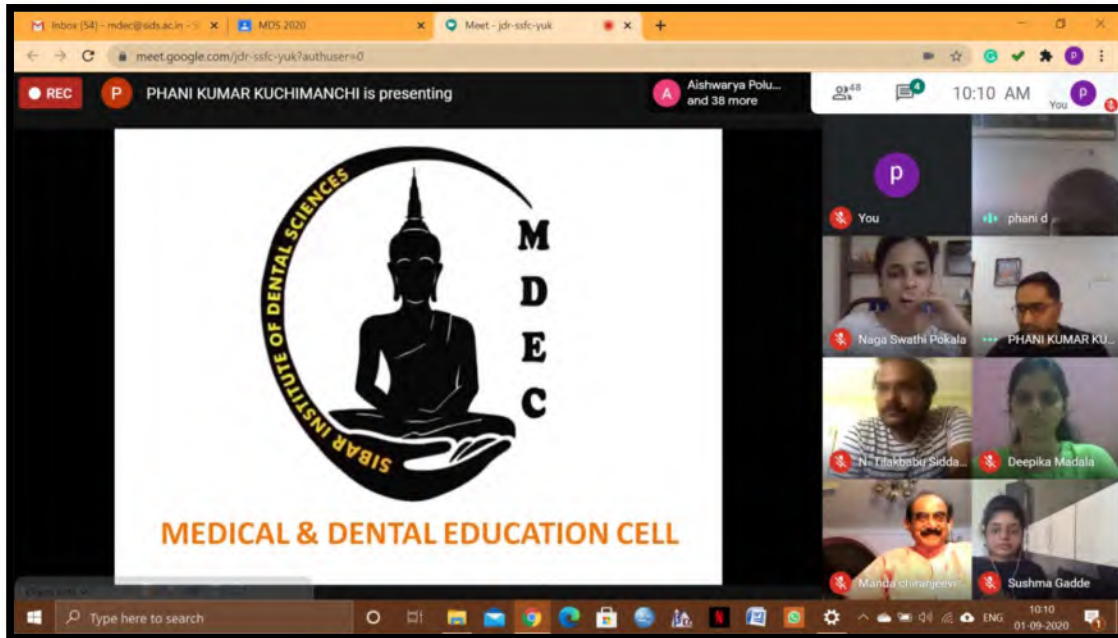

**Speaker: Dr Manda Chiranjeevi Das**

**TARGET GROUP/AUDIENCE:** I YEAR Post graduates

**Number of participants:** 43

**Minutes of the program**

Effective communication skills are important in an individual’s career and personal life. Communicating clearly is one of the most effective skills that one should inculcate. Etiquette inculcates a feeling of trust and loyalty in the individuals and makes them more responsible and mature. So the session was conducted on **“Communication Skills and Clinical Etiquette”** by **Medical/Dental Education Cell**, SIBAR Institute of dental Sciences, Guntur. Eminent speaker, **Dr. Manda Chiranjeevi Das** has emphasized that using good manners and following the rules of proper etiquette can make an incredible difference in how physicians and their staff are viewed by their patients. If patients feel valued by their physicians and have positive interactions with the staff, they are most likely to become longtime loyal customers. All the I year post graduate students attended the program and had an active participation in an interactive session with DR MC Das Garu. The program received an overwhelming response from the students. It would definitely support the students in developing a good communication skills and clinical etiquettes.

LECTURE ON COMMUNICATION SKILLS AND CLINICAL ETIQUETTE BY DR MANDA CHIRANJEEVI DAS ON 01/09/2020

**Date:**02-09-2020

**Timing of the Program:** 10:00AM to 11:30AM

**Topic:** HOW TO PRESENT A GOOD SEMINAR

**Criteria:** Soft skill development program

**Speaker:** Dr. Thavarajah Rooban, MDS, Oral Pathologist

**Target Group/ Audience:** I year POST GRADUATES

**Number of Participants:** 43

**Minutes of the programme:**

Seminars are capable of keeping the students updated with the technologies. Seminars provide latest information about the things which are happening in science and technology. Students cannot improve their knowledge from textbooks alone. They must take part in various seminars on latest topics, so keeping that in view MDEC planned a guest lecture on topic “HOW TO PRESENT A GOOD SEMINAR” by eminent speaker Dr. Thavarajah Rooban, MDS, oral pathologist enlightened about various aspects of seminar presentations and around 43 post graduates attended the programme in online platform.

Types of programme: Language and communication skill development

**Topic: “Significance of Language and communication skills in career”**

**Speakers** Samata, Professor and Head, Department of oral medicine and Radiology

**Target group/audience:** I BDS Students

**Number of participants: 84**

**Minutes of the programme:**

Language is the means of communication with fellow beings and the world outside for effectively conveying our thoughts and desires. The communication medium of today’s civilization undoubtedly thrives on the English language. This is because English has for long been the medium of instruction and communication in education, business, international trade, and commerce. It is an international language and is an important factor in today’s globalized world. So keeping that as consideration at Sibar Institute Dental Sciences has conducted a guest lecture “significance of Language and communication skills in career” to I BDS students in coordination with MDEC by Dr Samata, Professor and Head, Department of oral medicine and Radiology. In view of the current Covid situation the program was conducted in google meet online platform. She enlightened the students regarding the importance of communication skills and role of English in their career. A total of 84undergraduates of I BDS students has attended the program and shared their insights. An in-depth discussion was done with question-and-answer interactive session.

**Date:** 26-05-2021

**Time:** 5 pm to 6 pm

**Types of programme:** Yoga and wellness

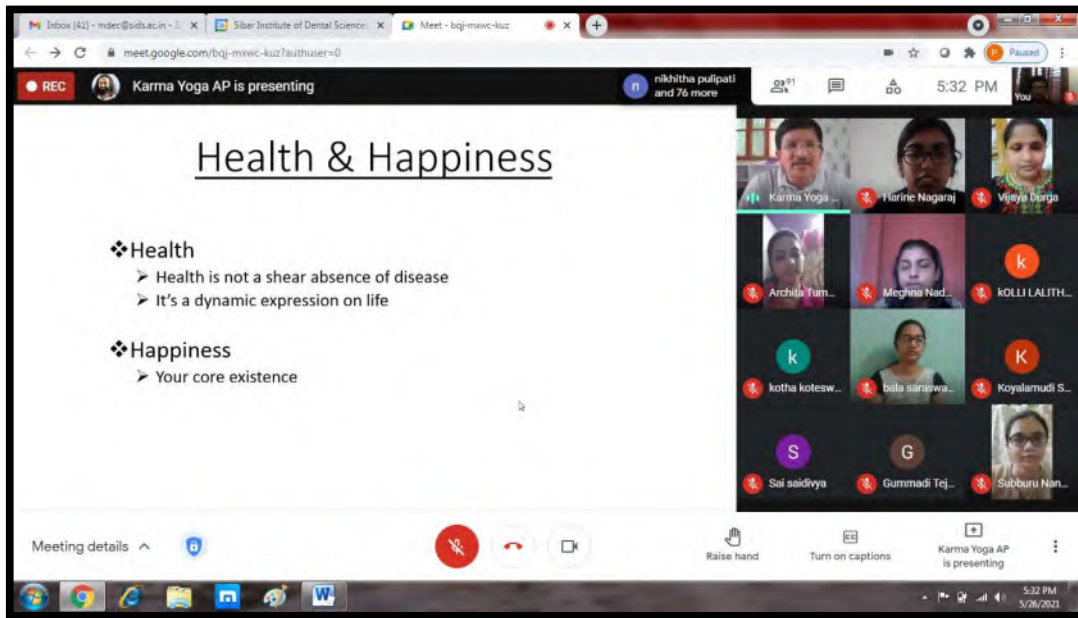

**Topic:** Art of Breathing during Covid-19 Pandemic: Session I

**Target group / audience:** Interns

**Number of participants:** 85

**Minutes of the programme:**

Every emotion, happiness, sadness, anxiety, anger- is associated with a breathing pattern. These diverse emotions change our breathing patterns and the rate and depth of breathing. The converse is also true. It is possible to control breathing patterns to influence our emotions and state of mind in this difficult situation of Covid 19 pandemic. On this note **MDEC** planned to organize such programme which is very beneficial to understand breathing as a vital source of energy that can be channelized to have a positive impact on the mind that is **Art of Breathing during Covid-19 Pandemic** at **Sibar Institute Dental Sciences**, to all the interns. Speaker. **Mr. Suresh Babu** who is ALO programme coordinator, enlightened the topic and had workshop on various breathing techniques. Around 85 interns attended the programme and actively involved in the interactive session. Finally, the programme ended by handing over the certificate of appreciation and a thank you note.

LECTURE ON ART OF BREATHING DURING COVID-19 PANDEMIC SESSION 1 BY SURESH BABU ON 26/05/2021

**Date:**05-03-2021

**Time:**10.00Amto 2.00pm

**Types of programme:** Analytical skill development

**Topic: POSTERS IN CONSERVATIVE DENTISTRY”**

**Target group/audience:** BDS Students

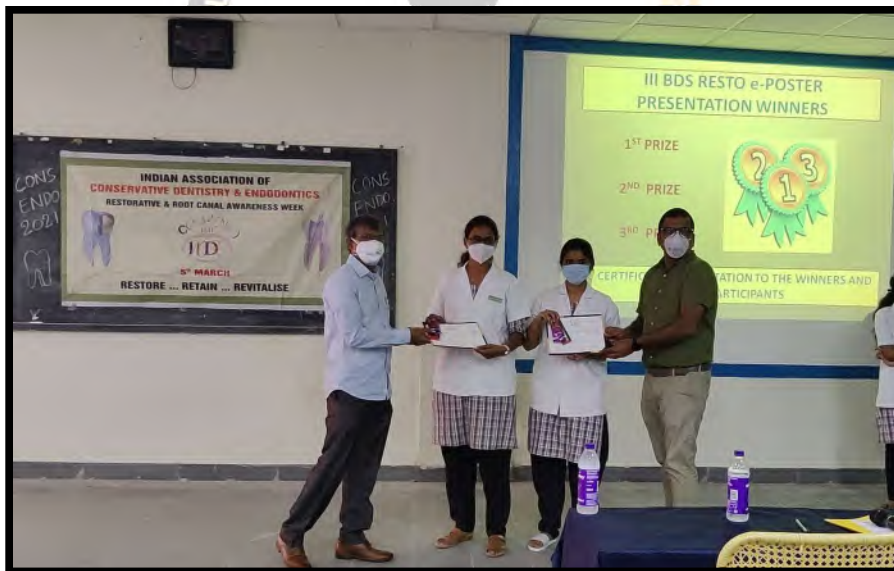

**Number of participants:** 24

**Minutes of the programme:**

•Most types of works in our day-to-day life and especially dentistry requires analytical skills. They are used to solve problems that may not have obvious solutions or have several variables. On the occasion of CONS AND ENDO DAY, MDEC, Sibar Institute of Dental Sciences along with department of conservative dentistry has organized a program to improve the analytical skills in students by presenting E Posters on the topic “E POSTER IN CONSERVATIVE DENTISTRY” The program is open to all students, and MDEC has received 12 POSTERS with almost 24 participants on the day of the program. Active participation is observed from all the students. The program continued till 2.00pm and ended with distribution of winner and participation certificates to all the participants.

POSTURE IN CONSERVATIVE DENTISTRY ON 05/03/2021

**Date:** 31.08.2020

**Time:** 10.00AM to 01.00PM

**Type of Program:** Human value development program

**Topic: “POSITIVE MINDS”**

**Speaker Profile: Dr. M.C. DAS SIR**

**Target Group/ Audience:** I Year POST GRADUATES

**Number of Participants:** 43

**Minutes of the Programme:**

One of the common dilemmas a graduate or a postgraduate, faces even after toilsome years of degree completion is how to develop a positive attitude, **Medical and Dental Education Cell, Sibar Institute of Dental sciences, (MDEC)**; organized a session by the renowned speaker **Dr. M.C.DAS SIR** on ‘**POSITIVE MINDS**’ aiming to improve the development of positive nature and proper mindset in post graduates. The program received overwhelming response from the target group post graduates with 43 attendees. It was a very interactive session reflected by over an hour dedicated solely for queries clarification.

**Date:** 11/09/2020

**Timings:** 05.30 PM to 07.30 PM

**Type of programme:** Professional skill development

**Topic:** Live Webinar: “OCCLUSION: PRINCIPLES AND PRACTICE”

**Speaker profile:** Dr. D. Satyanaryana; MDS (Periodontics)

**Target audience:** interns

**Number of Participants:** 71

**MINUTES OF THE PROGRAM:**

This was a live webinar conducted by MDEC of Sibar institute of dental sciences for the interns. The topic for the webinar was on “Occlusion: principles and practices”. The lecture was given by Dr. D. Satyanaryana, M.D.S. He is a periodontist by specialization. The program started at sharp 5:30PM. Dr. D. Sathyanarana had completed his BDS and MDS from Govt. dental college, Hyderabad. He has been into academics for 16years and later he resigned and currently a fulltime private practitioner at Hyderabad. At 5:35Pm the speaker started his lecture. In his lecture he included several concepts and theories on occlusion in simpler manner to make it more understandable to the interns. He also spoke about various armamentarium used to determine occlusion in the clinical aspect and also mentioned the advantages of using articulator for case in which occlusal modifications has to be done. In addition to these he added a note on some simple clinical tips to be followed while establishing proper occlusion during all kinds of restorative treatments. The lecture was concluding at 7:20PM. Later, we had a questionnaire session in which interns clarified their doubt’s regarding the topic with the speaker.

REC srikanth r is presenting

Transmission

SARS-CoV-2 is primarily spread from person to person through respiratory particles, probably of varying sizes, which are released when an infected person coughs, sneezes, or speaks. Because both smaller particles (aerosols) and larger particles (droplets) are concentrated within a few meters, the likelihood of transmission decreases with physical distancing and increased ventilation.

Among patients who are symptomatic, the median incubation period is approximately 4 to 5 days, and 97.5% have symptoms within 11.5 days after infection.

### HOW TO USE A MASK

- Before wearing a mask, wash your hands with an alcohol-based disinfectant or with soap and water.
- Cover your mouth and nose with the mask and make sure the mask is firmly pressed against your face.
- Do not touch the mask while you are wearing it; if you do, wash your hands with an alcohol-based disinfectant or with soap and water afterward.
- Replace the mask as soon as it gets wet and do not reuse disposable masks.
- Remove the mask from behind (do not touch its front side); throw it away in a closed container and then wash your hands with an alcohol-based disinfectant or with soap and water.

**Target group / audience:** Interns

**Number of participants:** 80

**Minutes of the programme:**

Infection prevention and control (IPC) is the practice of preventing or stopping the spread of infections from the delivery of healthcare services. IPC is a critical part of health system strengthening and must be a priority to protect patients and healthcare workers. In the context of COVID-19, the IPC goal is to support the maintenance of essential healthcare services by containing and preventing COVID-19 transmission within healthcare facilities to keep patients and healthcare workers healthy and safe. This webinar enabled the students to understand the importance of IPC during routine dental practice and especially during COVID 19 era.
